

New Native Flower Beds at CAPE MAY POINT ENTRANCE

The Environmental Commission is excited to share that the flower bed adjacent to the pillars on the northwest corner of Sunset and Cape Avenues have been replanted. These new all-native-plant beds are filled with drought tolerant perennials that will beautify this entrance to Cape May Point, as well as support wildlife. The native bushes that had previously grown in the beds were transplanted to various locations around Lake Lily.

We invite you to stop by to admire the new entryway beds!
