

See a Stranded Mammal on the Beach?

The [Marine Mammal Stranding Center](#) has offered our Borough two free signs that provided information about what to do if you see a marine mammal stranded on the beach.

When the signs are received, they will be placed along the Alexander and Coral Beach pathways. In the meantime, if you see a stranded mammal, please reference the information on the "Give Seals Space" notice below.

Best regards,
The Cape May Point Environmental Commission
